Experience

Software Developer — *Tech Company Inc.*

June 2019 – Present

- Developed and maintained web applications using React and Node.js. Saved the company from certain doom with my wizard-like coding skills.
- Collaborated with cross-functional teams to define and achieve project goals, while mastering the art of surviving endless meetings.
- Implemented RESTful APIs and integrated third-party services like a boss.
- Improved application performance, reducing load time by 30%. My code runs faster than a cheetah on Red Bull.

`node.js / RESTful-API`

Intern — *Another Tech Company*

June 2018 – August 2018

- Assisted in the development of an internal tool for data analysis. Basically, I turned coffee into code.
- Participated in code reviews and contributed to the improvement of code quality. I'm the secret sauce behind those spotless codebases.
- Wrote unit tests to ensure code reliability. My tests are more reliable than your morning coffee.

`coffee machine / git`

Projects

Project One

- Developed a full-stack web application for task management using React and Node.js. Yes, another to-do list app, but this one is special.
- Implemented user authentication and authorization with JWT. Keeping the bad guys out, one token at a time.

`node.js / React`

Project Two

- Created a machine learning model to predict stock prices using Python. Spoiler: it didn't make me a millionaire.
- Visualized data trends and model performance with Matplotlib and Seaborn. Because pretty graphs make everything better.

`Python`

Profile

I'm a passionate software developer who loves crafting products that people love. I'm a huge lover of Open Source and also volunteer in many communities. I care about making the customers happy, testing, accessibility, teamwork, and code quality. When I'm not coding, I'm probably thinking about coding.

Skills

- **Programming Languages:** `Python, Java, C++`
- **Web Development:** `HTML, CSS, JavaScript, React`
- **Databases:** `MySQL, PostgreSQL, MongoDB`
- **Tools:** `Git, Docker, Jenkins`

Languages

German	●●●●●
English	●●●●○
Spanish	●●●○○

Open Source

I have contributed to projects such as Mock Service Worker (used by thousands) and Testing Library (used by millions). I also volunteer in communities like KCD and Remix. When I say I'm into Open Source, I mean it – I dream in pull requests.

Interests

Qudditch, Speed Typing with One Finger, Inventing New Sandwiches
